

2/19/2003

**Amendments to the Claims:**

1-18. (Canceled)

19. (New) Optically superior sunglasses, comprising:

a wrapping frame, including a frame front; and

a pair of lenses attached to the frame front, wherein:

each of the lenses is canted with a predetermined amount of negative lens

power and the frame has a wrapping configuration to result in a wrap angle deviating from 90°; and

the frame is sized to result in a predetermined decentering distance that

eliminates distortion caused by the wrap angle deviating from 90°.

<sup>20</sup>  
22. (New) The sunglasses of Claim 20, wherein the predetermined amount of negative lens power is no more than -0.25 diopters.

<sup>21</sup>  
21. (New) The sunglasses of Claim 20, wherein the predetermined decentering distance is about 1.0cm.
